– A story of a horse

## Roadscanner – A story of a horse

On the 17th of June 2009 a warm blooded foal was born in the middle of Sweden. His mother was a wise Swedish mare named Quick Fix PR and his father was a French gentleman, a stallion named Orlando Vici. Both parents were racing trotters. The foal was a stallion and he got the name Roadscanner as a symbol for possibilities, development, hope, progress and success.

He was a hungry little boy and his mother gave him all the care he needed...

...so he was growing quickly...

...and soon he was running in the fields with his playmates.

All trotters have for practical reasons their birthday on the 1st of January every year. So all of a sudden Roadscanner was 1 year old. He started to learn to obey the driver's wishes to go to the left and to the right and also to draw a carriage. He was a quick learner.

The 29th of September 2010 was a sad day for Roadscanner. In the morning his mother Quick Fix P.R. was found dead in the grass enclosure carrying his little sister or brother inside.

But youngsters will not be sorry for long time. Roadscanner had a good friend of the same age, the stallion Jetset Airline. Here Roadscanner is whispering secrets to his best friend.

Anyway playtime will not last for ever. The time has come for starting to work. The work is training how to behave as a trotter. The muscles have to be built up to stand hard training and racing.

The speed must be increased to be a winner.

Here he is on a training tour with his best friend on the training track.
